SUMMARY

Product manager and builder with experience shipping mobile software, translating user and business needs into product requirements, and leading cross-functional teams through agile delivery. Experienced across user research, roadmapping, backlog management, technical specifications, product launches, and post-launch iteration, with hands-on technical fluency in React Native, APIs, Firebase, and AI-powered products.

EDUCATION

University of Southern California **Los Angeles, CA**
B.S in Arts, Technology, and the Business of Innovation *May 2026*

EXPERIENCE

MyAddisonApp **Los Angeles, CA**
Product Manager *Nov 2024-May 2026*

- Recruited and led a 12-person cross-functional team of engineers, designers, and marketers through weekly agile sprints, shipping 5 production releases of Addison, a React Native iOS mobile productivity app for executive function support
- Owned roadmap and backlog against release timelines and engineering capacity, defining requirements for a technically constrained stack including Apple's Family Controls entitlement for OS-level app blocking, RevenueCat subscription infrastructure, and Azure OpenAI integration
- Diagnosed and resolved a series of App Store review rejections spanning Sign in with Apple, iPad crash conditions, paywall discoverability, and account deletion, holding release schedule through repeated resubmission cycles
- Built the lifecycle and acquisition layer end to end: Firebase FCM push and Loops email sequencing and Google Ads install campaigns measured on first_open conversion
- Managed team permissions and credentials through Expo, Microsoft Azure, Apple Developer Account, Gmail, etc.

McCarthy Holdings Inc **Los Angeles, CA**
Product Manager Intern *Dec 2025-May 2026*

- Ran intake and requirements definition in Aha! for Field Echo, an AI enterprise communications product, scoping the MVP through 20+ interviews across McCarthy executives, IT leadership, field operations, and Palantir forward-deployed engineers
- Authored the v1 spec and owned the Aha! roadmap and backlog that translated stakeholder requirements into technical scope for Palantir FDEs, driving to executive validation on schedule
- Defined REST and SOAP integration and data mapping requirements against existing enterprise systems, and negotiated PII-safe mock data access with IT leadership for live testing

Thales Group (Industry Practicum) **Los Angeles, CA**
Product Consultant *Aug 2023-Jan 2024*

- Ran primary research across three distinct passenger segments on a 4-person team, applying thematic and correlation analysis to convert interviews into personas and prioritized findings
- Synthesized both phases into a research deck presented back to Thales, delivering four strategic recommendations and a phased roadmap in response to an open-ended enterprise brief
- Translated research findings into prioritized product requirements and feature concepts, mapping each recommendation to the passenger segment and business objective it addressed

PROJECTS

Stewardship Suite (Next.js, Firebase, Supabase, Claude API, Plaid, Vercel): Designed and built three connected applications sharing a single authenticated data contract, with **Godspeed** producing job location and salary data, **Provision** reading it to flag listing affordability and producing rent and deposit costs, and **Prosper** consuming those as forecasted cash flow. All cross-app calls authenticated server-side with a shared secret

Prosper: Built and designed a financial management web application integrating Plaid for bank account aggregation, the Claude API for transaction categorization and spending insight generation, and Supabase for authentication and data persistence

Godspeed (godspeedjobs.com) : Designed and shipped a job-search tracking dashboard with over 500,000+ dynamic pulled job data consolidating applications, statuses, and follow-up timing into a single interface with agentic AI applications. Commercialized it by connecting Stripe API and

SKILLS

Product: Roadmapping, backlog management, sprint planning, agile and scrum delivery, intake and requirements definition, technical specification writing, release planning, prioritization, stakeholder management, user stories
Technical: REST and SOAP API integration, data mapping, system design, React Native, Firebase, GA4, RevenueCat, PII protection and de-identification, SQL, Aha!, Jira, Monday, Notion, Confluence
AI: Claude and Anthropic API, Claude Code, Azure OpenAI, AI-assisted prototyping and workflow automation

CERTIFICATIONS

Atlassian Agile Project Management Professional Certificate - LinkedIn *September 2026*
Agentic AI Fundamentals: Architectures, Frameworks, and Applications – LinkedIn *Aug 2026*
